DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-27 and 30-40, drawn to a composite polymer electrolyte membrane, classified in class 429, subclass 33.
- II. Claims 28 and 29, drawn to a method of making a composite polymer membrane, classified in class 29, subclass 623.1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made by materially different processes such as thermal mixing of solid polymer materials or sintering.

3.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Art Unit: 1745

If Applicant elects group I to the product the following species election must be addressed:

6. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I, claims 1-13 drawn to a polymer electrolyte membrane wherein the additive polymer materials comprise a first polymer of a sulfonated polyarylene polymer and a second polymer comprising a hydrocarbon polymer sulfonate other than a sulfonated polyarylene polymer.

Species II, claims 14-27 and 30 drawn to a polymer electrolyte membrane wherein the additive polymer materials comprise a first polymer of a polyarylene polymer sulfonate and a second polymer comprising a sulfonated polyarylene polymer. Thus both of the materials are similar, unlike species I.

Species III, claims 31-40 drawn to a polymer electrolyte membrane wherein the additive polymer materials comprise an aromatic compound unit with an electron-attractive group in its principal chain and an aromatic compound unit without an electron-attractive group in its principal chain.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim

is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

7. A telephone call was made to Mr. Darryl Mexic on March 12, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 1745

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
